

# 22<sup>nd</sup> Thermal & Fluids Analysis Workshop (TFAWS)

*Developing Our Future in Aeronautics and Space Through Technology*

**August 15 – 19, 2011 • Newport News, VA**

## **Purpose:**

To encourage knowledge sharing, professional development, and networking throughout the thermal and fluids engineering community within NASA and the aerospace industry at large.

## **Technical areas of focus:**

- Passive Thermal Control and Protection
- Life Support/Active Thermal
- Aerothermal

## **Featuring:**

- Paper sessions
- Hands-on software training
- Software demonstrations
- Hardware demonstrations
- Technical short courses
- Guest speakers
- Tours of NASA LaRC
- Free registration!

## **Audience:**

Anyone interested in thermal and fluids analysis, including, but not limited to:

- Engineers
- Scientists
- Thermal and Fluids Analysis Tool Users
- Educators
- Students

*All levels of experience are welcome!*

## **Paper Submissions:**

Call for Papers is [online](#) and abstracts are due by April 29, 2011.

**Hosted by the NASA Langley Research Center (LaRC)**

**Sponsored by the NASA Engineering and Safety Center (NESC)**
