TFAWS 2014
Thermal and Fluids Analysis Workshop

Solicitation for Thermal/Fluids Vendor Participation
Please respond by April 18, 2014

Conference Details

The 25th Thermal and Fluids Analysis Workshop, TFAWS 2014, sponsored by the NASA Engineering and Safety Center and hosted by NASA John H. Glenn Research Center, is tentatively scheduled for August 4 to August 8, 2014 in the Cleveland, Ohio area.

This year's conference theme is: **25 Years of Thermal and Fluids Collaboration and Innovation.**

Conference Proceedings

The three technical areas of focus for TFAWS 2014 are Passive Thermal, Active Thermal, and Aerothermal. An Interdisciplinary session will also be included for those submissions that do not fit in a single category.

Software Vendors

Software training classes will be available from the software vendors themselves, as well as technical experts who utilize these software programs in their daily work. This presents a unique opportunity for training in programs that participants may be unfamiliar with or to advance previous knowledge and experience. Previous software training courses included MAYA, NX Space Systems Thermal, MAYA FEMAP,Thermal Desktop, Fluent, Star CCM+,TSS, MSC Patran Thermal, Generalized Fluid System Simulation Program (GFSSP), Fully Implicit Ablation and Thermal Analysis (FIAT) Program, and Stat-Ease.

Software companies have three options for participating in TFAWS aside from participating in Paper Sessions. One option is to have a **booth** on display with information. The second option is to host a **hands on training course,** typically scheduled in two to four-hour blocks of time**,** that covers tutorials with conference guests. The final option is to give a short **demo** on the capabilities of the software or specific applications for approximately one hour.

Hardware Vendors

Hardware companies have two options for participating in TFAWS aside from participating in **Paper Sessions**. Additional presentation options include a **booth** on display with information and/or a short **demo** on the capabilities of the hardware or specific applications. Demos are typically scheduled in

twenty minute to one hour blocks, depending upon the vendor's preference.

If your company is interested in participating as a vendor, please fill out the form which follows and return to f.d.koci@nasa.gov by April 18, 2014.

Please type or print legibly

Software or Hardware:		Company Name:
